

Assignment: <CS 106>Lab <1>

Team Name: <Thumu-Ngochanthra>

Log table:

Date/Time	Task	Time spent	Driver	Navigator	Notes
2/24/21 ~10:10 - 10:40	Working on Prelab [created student class and working on constructor]	About half an hour	Neha	Mata	We were a bit confused initially but now we know what do (for constructor)
2/24/21 20:56 - 21:37	Working on Prelab	36 minutes	Mata	Neha	Unsure of how to do for #7 and #8 of prelab -- will ask TA
2/25/21 ~4:50 - 5:10	Asked TA questions	About half and hour I think	Neha	//	The time was too early for Mata so I, Neha, went to ask some questions we had and made some alterations to the code based on that.
2/27/20 9:07 -10:07	Working on Lab	1 hour	Mata	Neha	Create a class and constructor
2/27/20 10:20-11:20 and ~12:00	Working on Lab	About 1 hour	Neha	Mata	<ul style="list-style-type: none"><li>- add getter and setter method</li><li>- develop constructor</li><li>- isWhite(), isBlack(), hasReoffended(), isLowRisk( ), and isHighRisk( )</li></ul>
2/28/20 8:36-9:34	Asked TA questions	58 minutes	Mata	//	<ul style="list-style-type: none"><li>- Check the overall code</li><li>- Fix getter</li></ul>

					and constructor - Fix boolean function
3/1/21 12:37 - 1:32	Finishing up code and added comments.	55 min	Neha	Mata	Need to double check everything before submitting.
3/2/21 [sometime around 1 am?] 9:30-9:48	Final check - skimmed through and edited a bit	~20-25 min	Neha	//	Sorry forgot to log at 1am- it was a bit spur of the moment and then I realized I wouldn't be productive. As Mata reorganized a large chunk of our work during the TA hour, it was only fair for me to do the final check.

We understand that pair programming is a collaborative process where both partners work together. Each partner is expected to "drive" roughly 50% and "navigate" 50% of the time the team is working together. The objective is to work together, learning from each other, not to divide the work into two pieces with each partner working on a different piece. Therefore, at most 20% of an individual's effort for an assignment should be spent working alone. By signing below, we certify that the above log is an accurate reflection of how we spent our time on this project.

Member1: Neha Thumu  
Member2: Mata Ngochanthra

Skillset: Python and Java  
Skillset: Python and R
